PROFESSIONAL PROJECTS

SERWED - Synthetic Extreme Rare Weather Events Data

GitHub - [<https://github.com/MarawanYakout/SERWED>]

Feb 2026

- A physic informed Machine Learning, context-conditioned **DDPM (Denoising Diffusion Probabilistic Model)** using context-UNet for generating syntetic multi-spectral satellite cloud imagery using **NASA GPM & GOES** satalite datasets with associated timestamps of atmospheric parameters e.g. wind speed, oceantype and storm development to address class imbalance, enabling conditional generation, robustness and rapid experimentation with hurricane events being presented with only 0.14% (202 of 140,514) samples of the dataset, achieving an average **Log-Spectral Distance (LSD) of 4.5 dB** at 16×16 resolution with scalability to larger sizes.
